

# Drop-Off Analysis

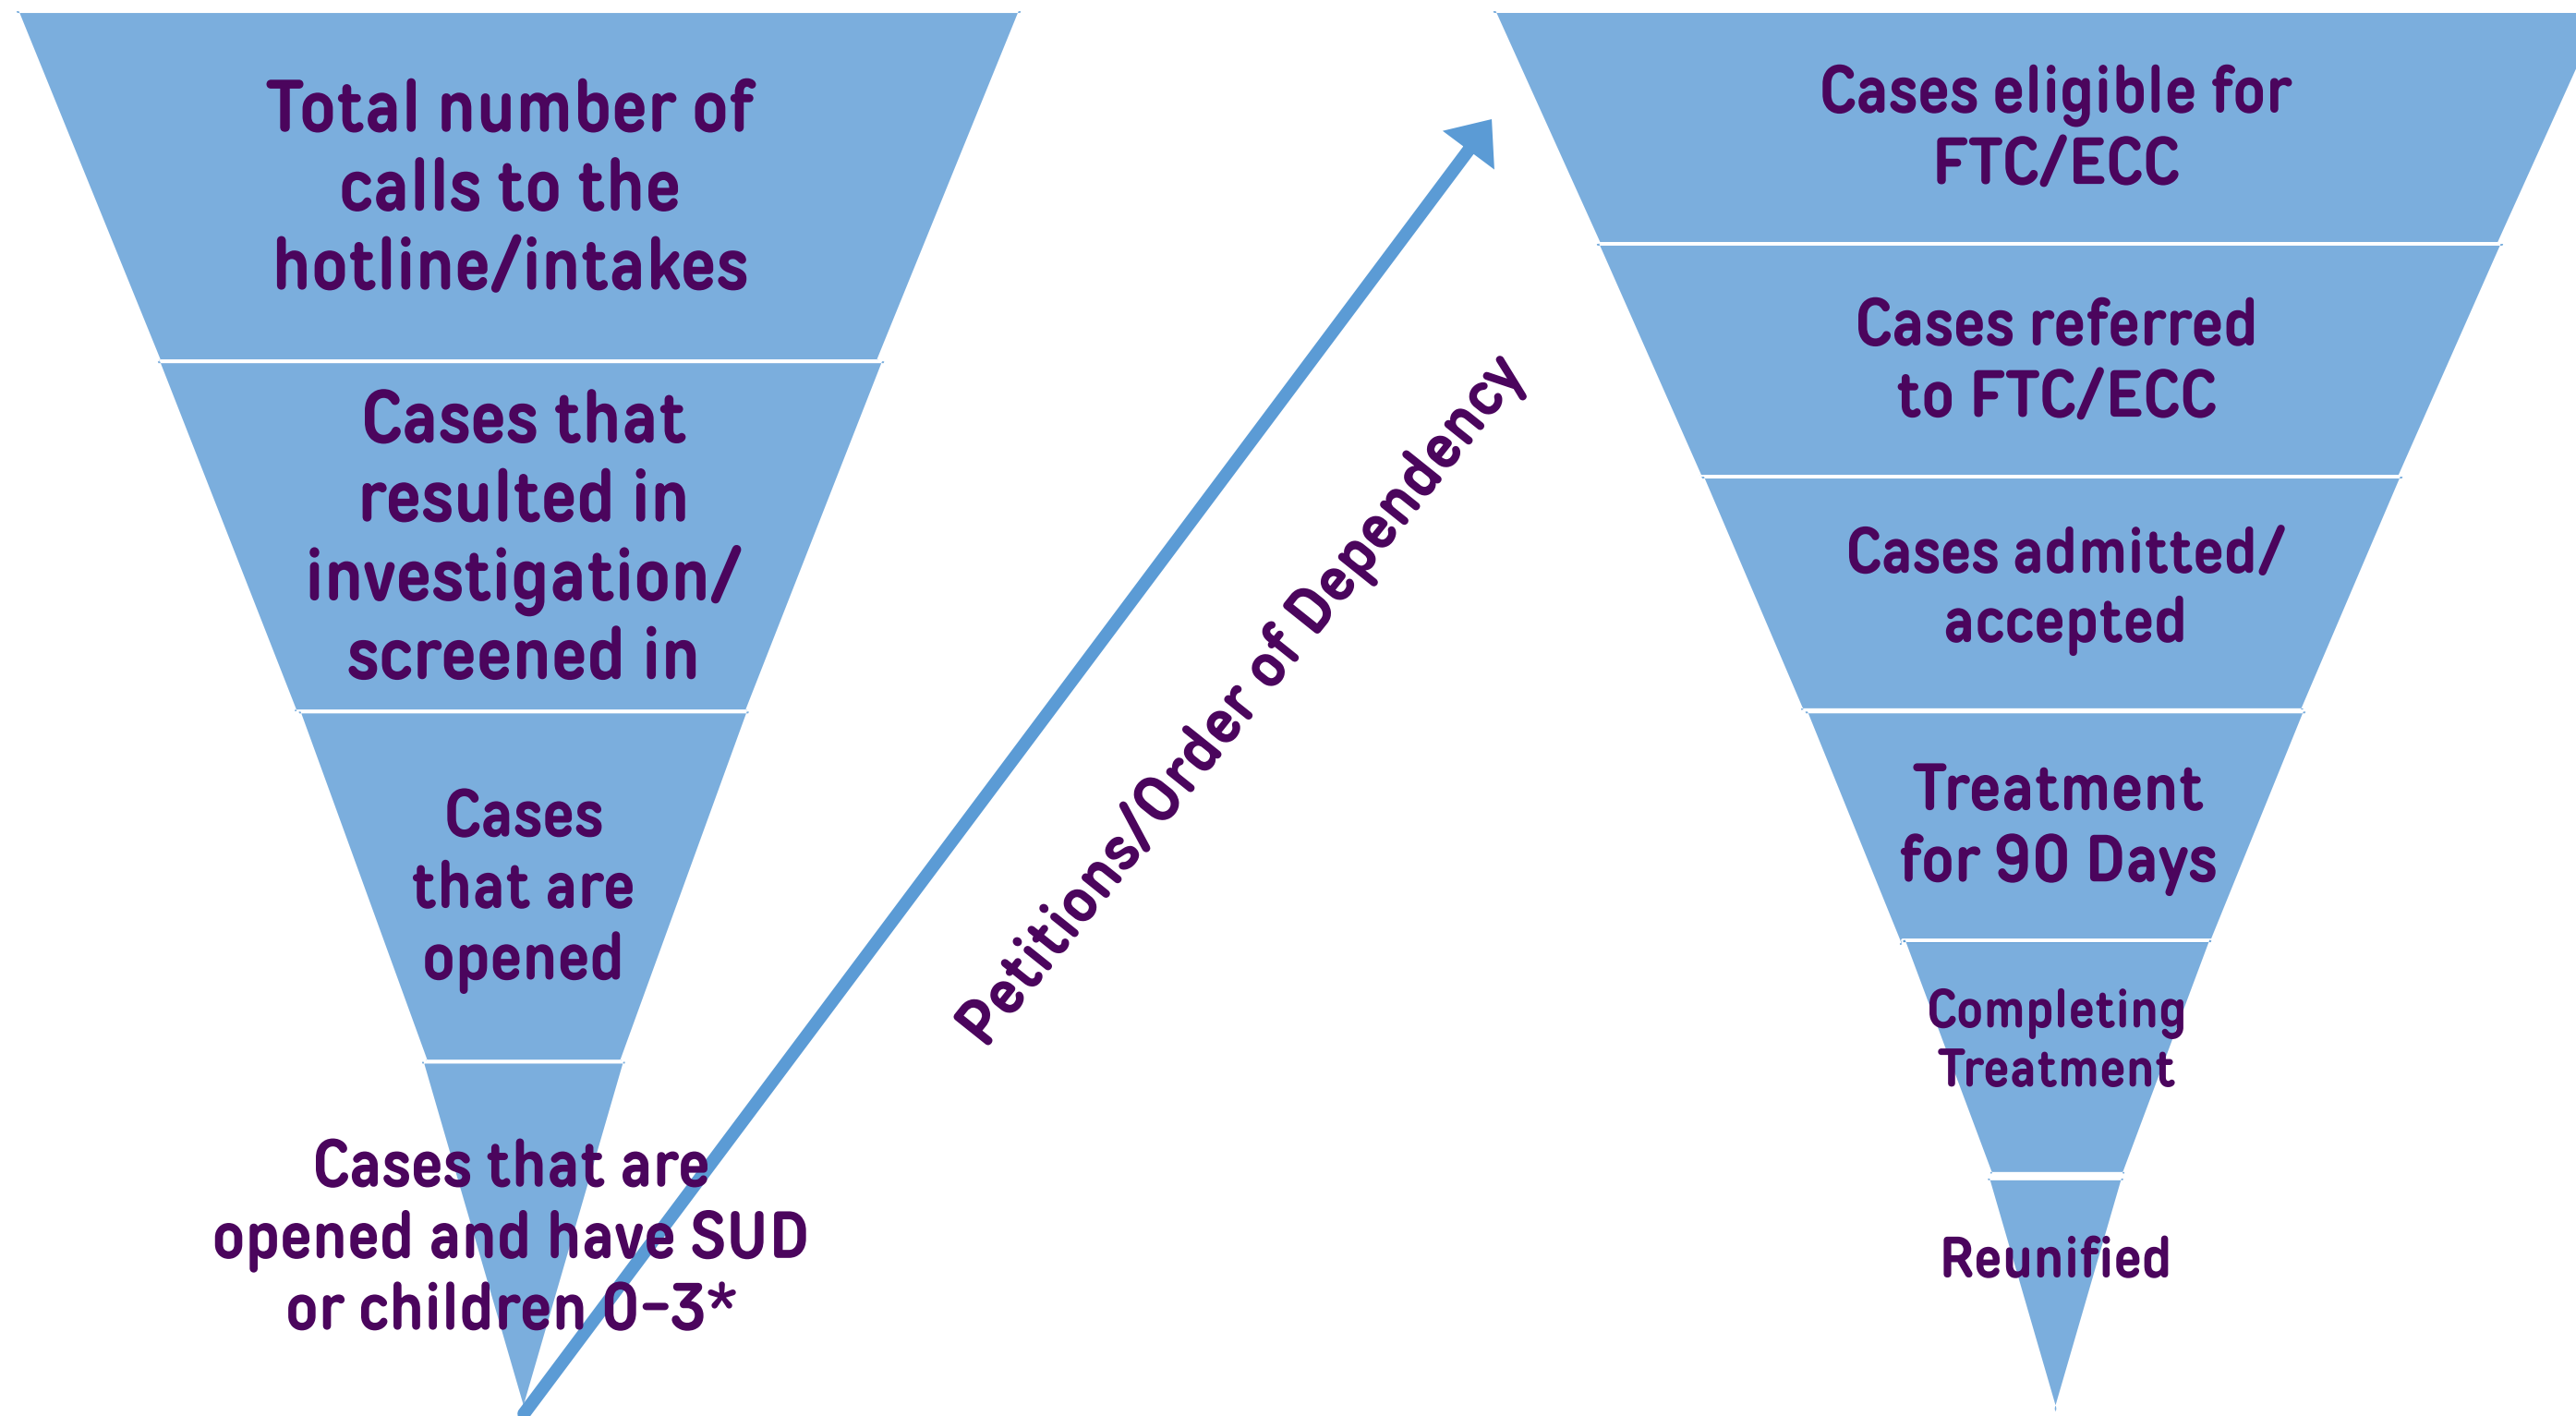

# What is it?

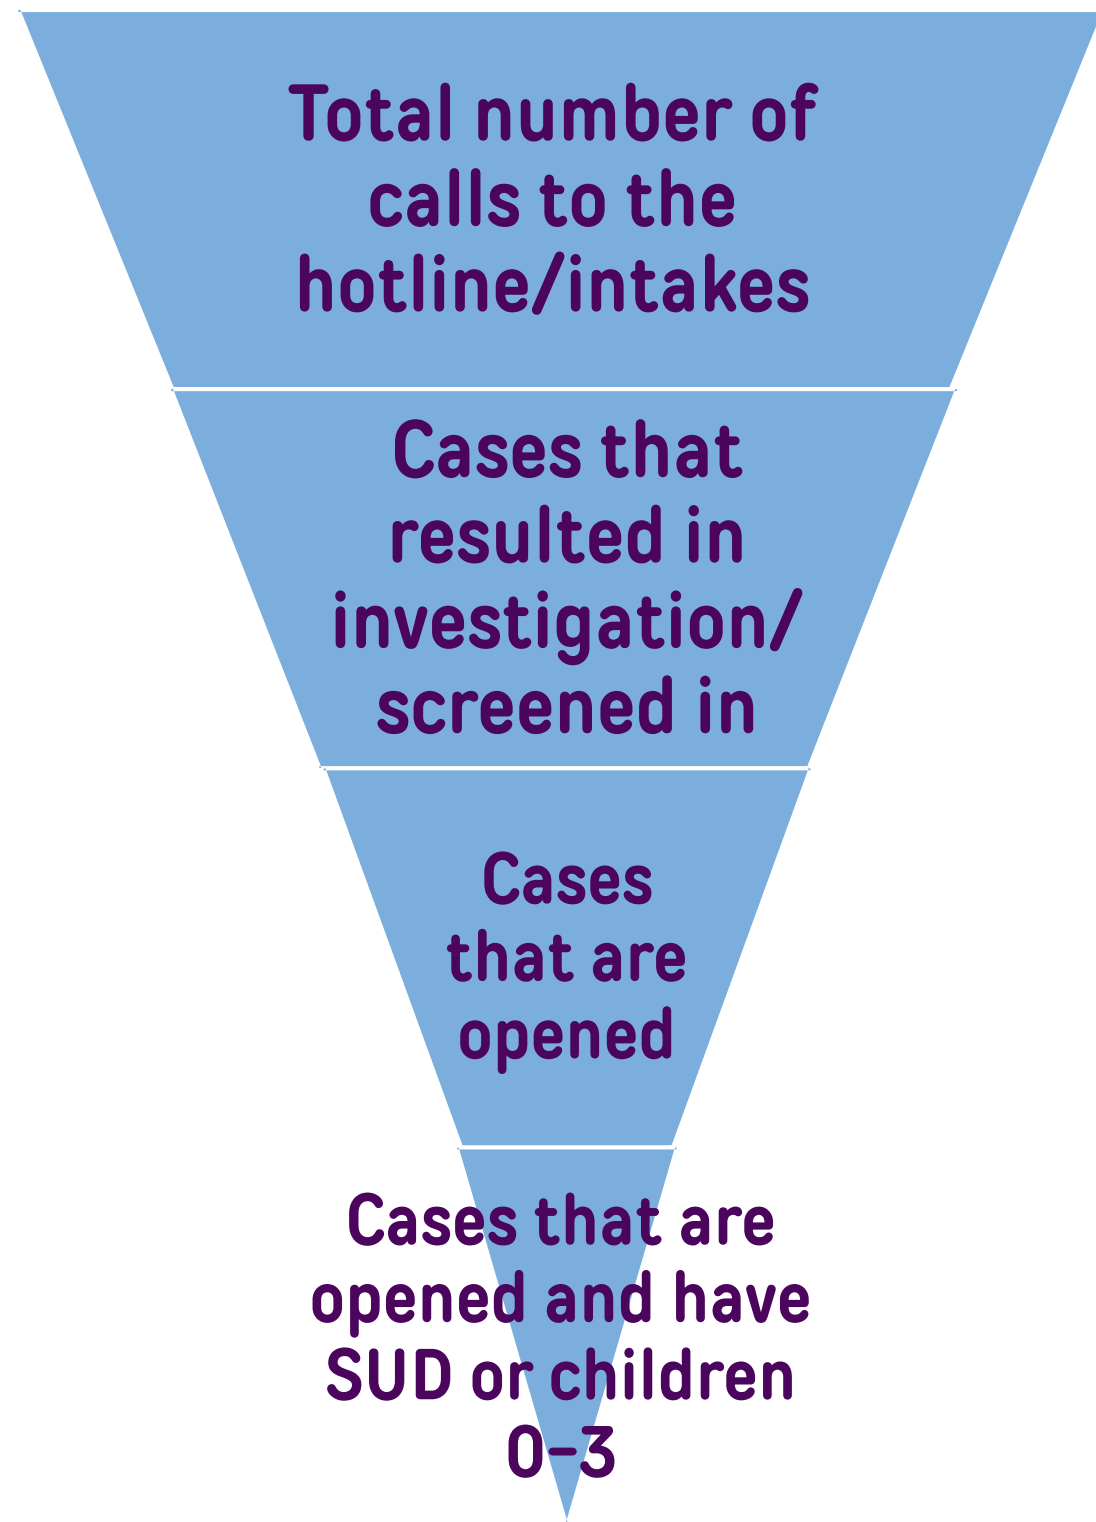

- A drop off analysis is a directed implementation strategy to determine where a program loses participants

# The Process

- Collect Data
- Discuss the Results
- Decide On and Implement Improvements - set a goal
- Repeat - how often is determined by your goal

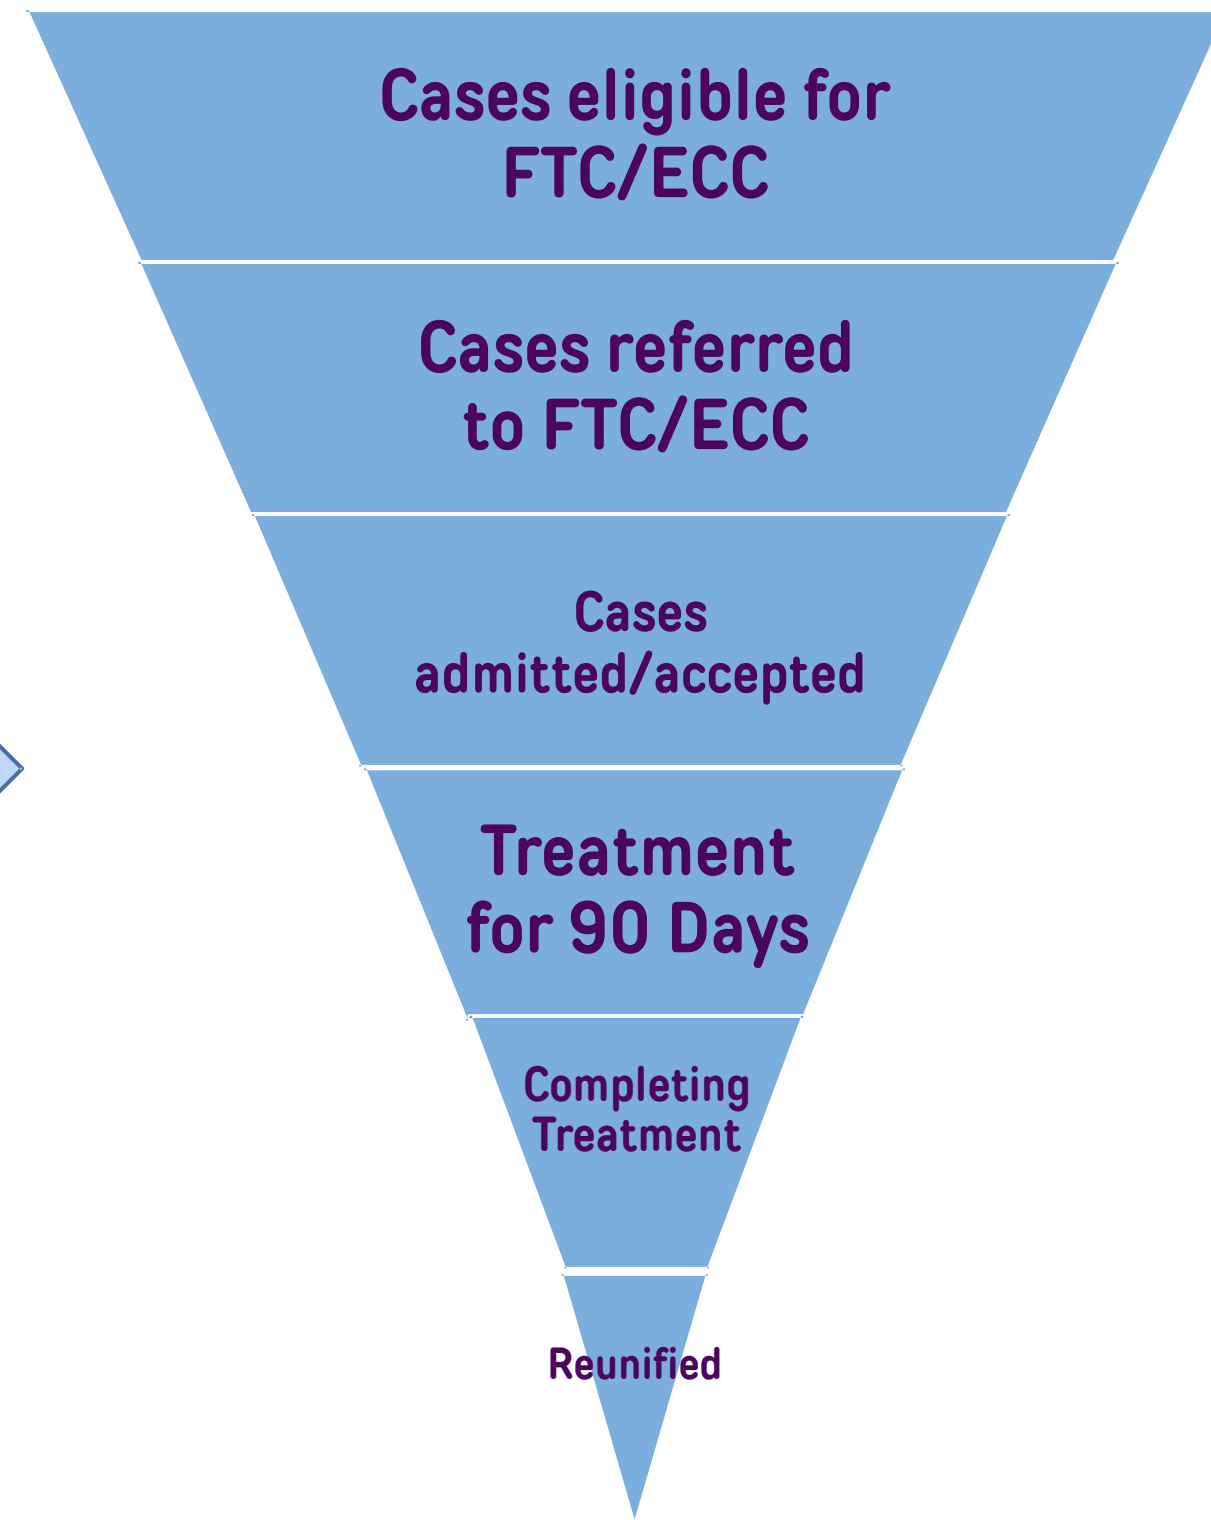

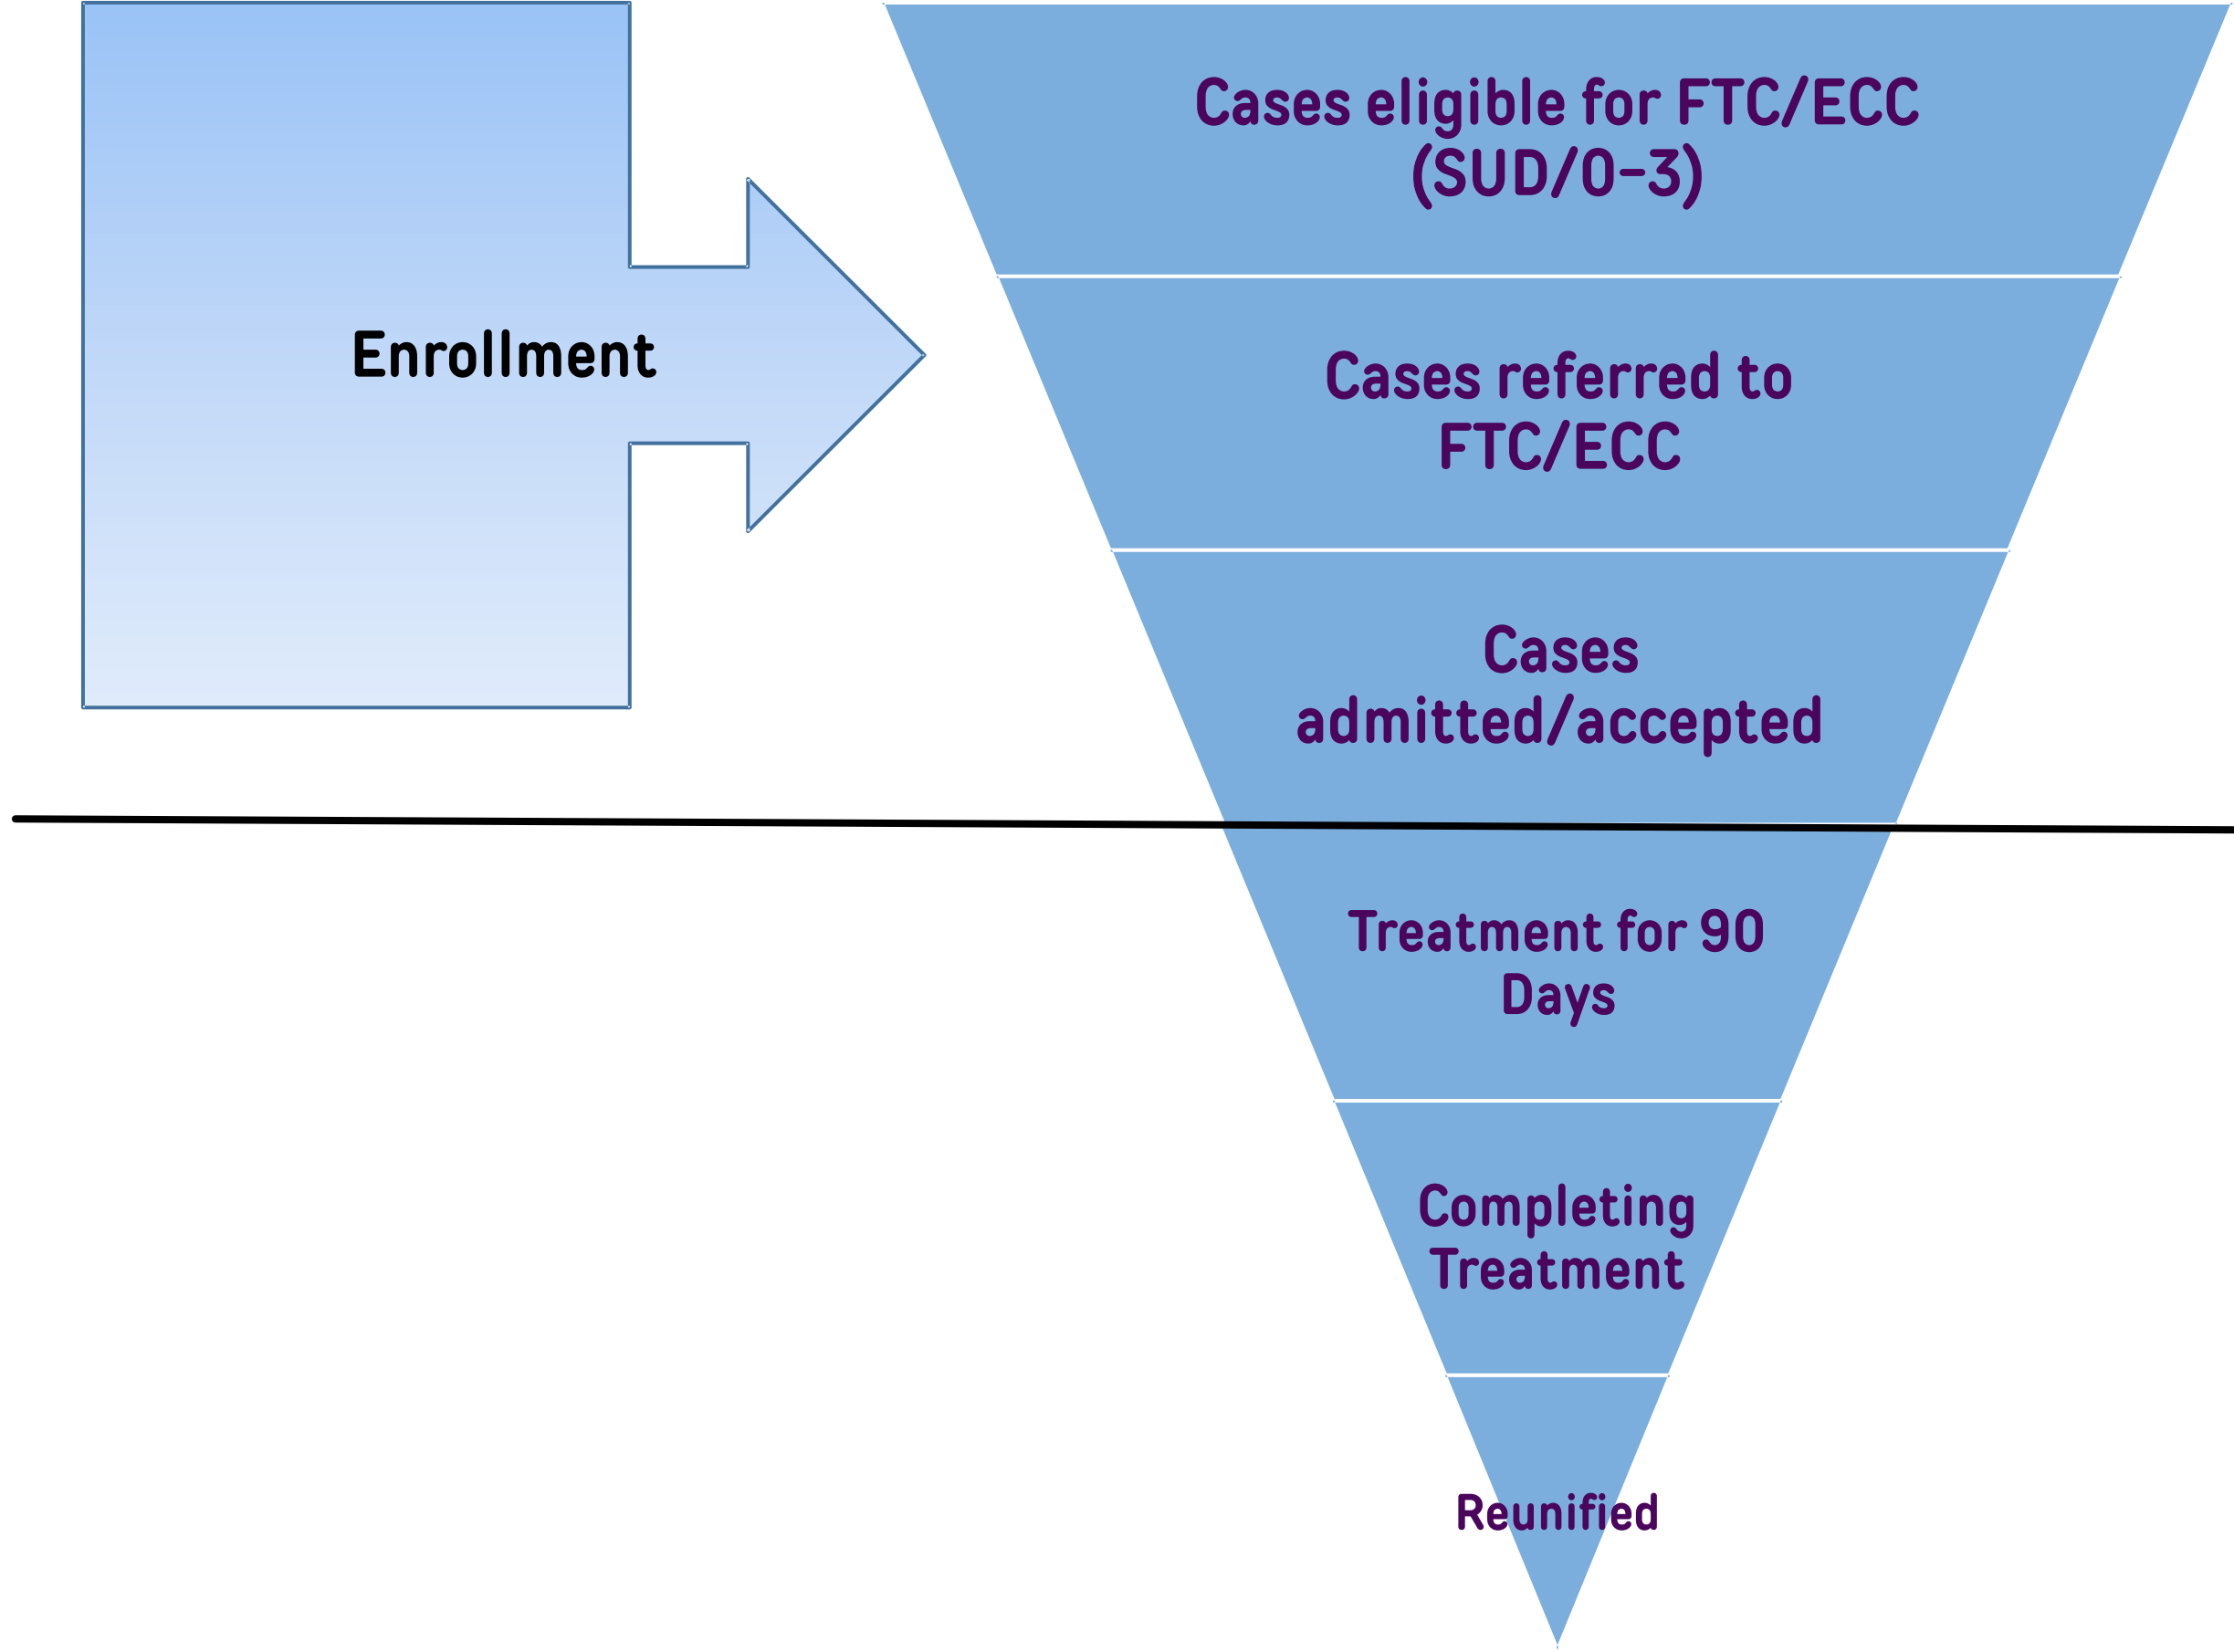

**\*SUD and 0-3 are current requirements for some programs, feel free to change this to match other requirements as needed**

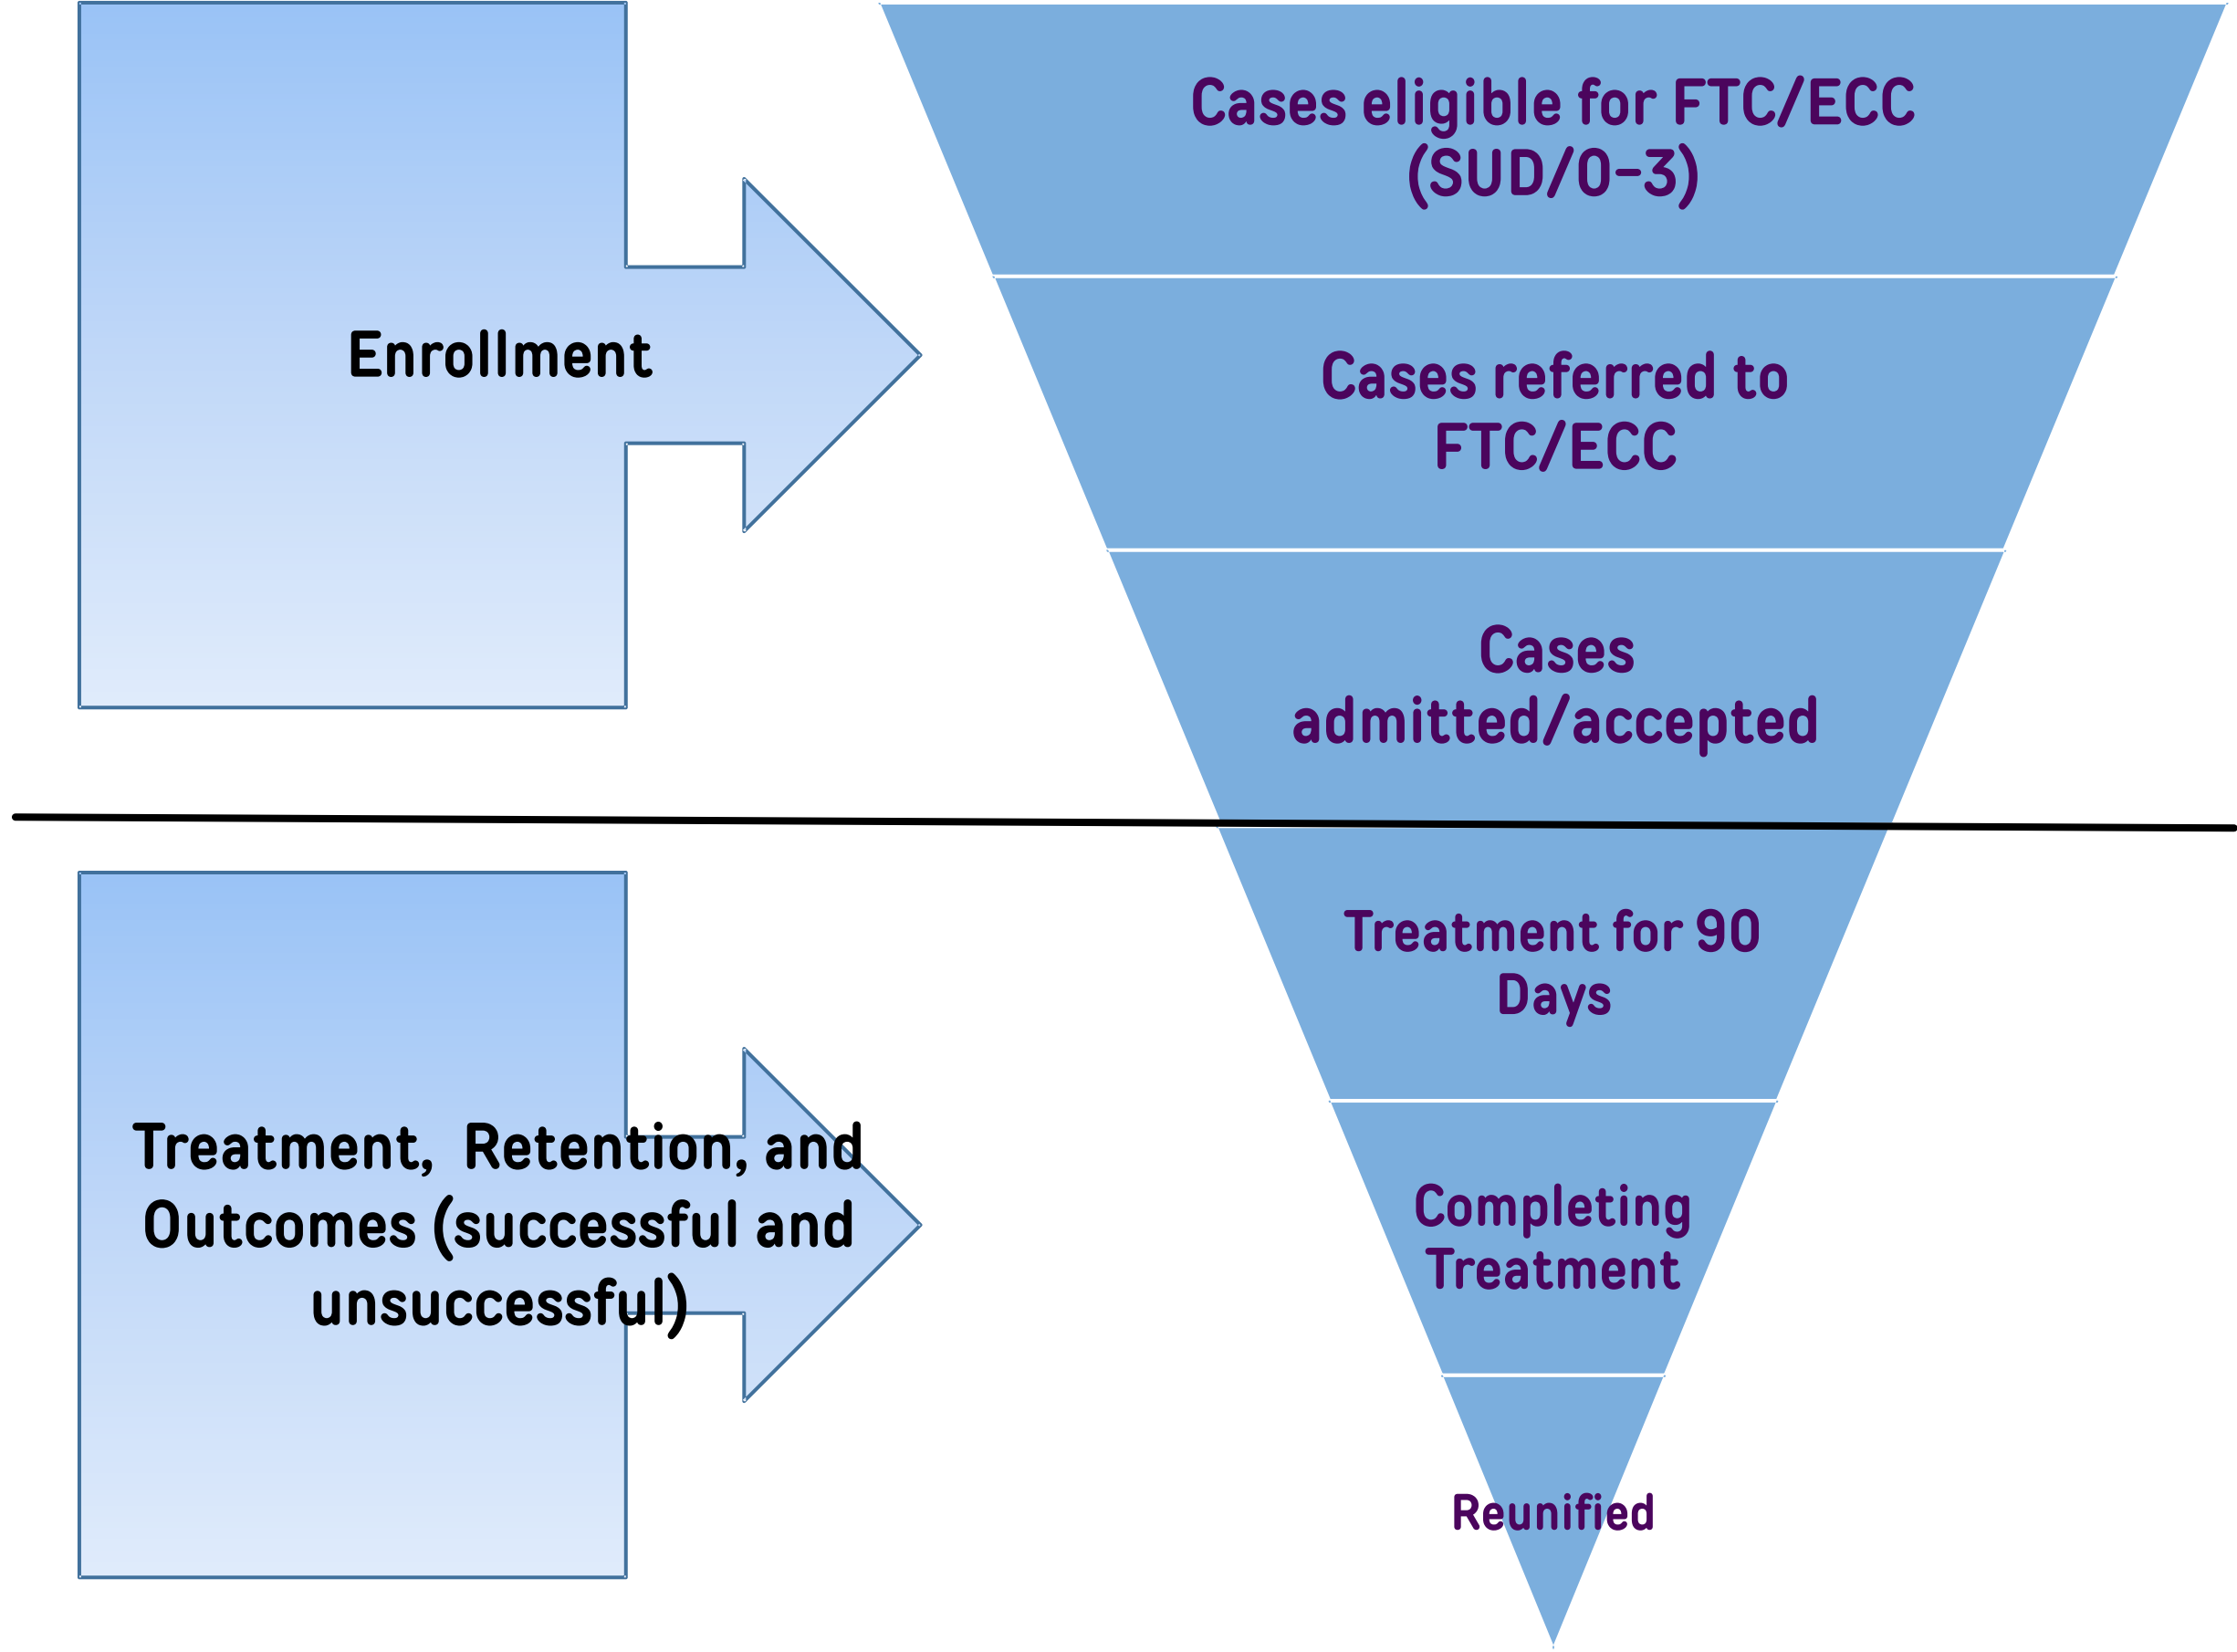

**This part of the analysis is really looking at the front end of the system. What is happening with the families when they first enter the system?**

**The next part is looking at families that are eligible for our programs and what is happening to them throughout the program.**

# Drop-Off Analysis and Race

# How are drop-off analyses useful?

- Ongoing data monitoring – walk-through your system
- **The Process:**
  - **Collect the data**
  - **Discuss the data**
  - **Set goals**
  - **Make changes**
  - **Collect data**
  - **Repeat the drop-off**
- Strategic data collection helps courts choose change management strategies that are the most effective
- It can help answer the “why” questions about disparities
  - Should include other indicators
  - “Number and percentage completing treatment by race/ethnicity”
